Profile Summary

Experienced Full-Stack Developer skilled in JavaScript, Python, and modern frameworks. Proven success in building scalable APIs, integrating AI, and automating data security tasks. Strong background in project leadership and competitive coding achievements.

Skills

JavaScript | Python | TypeScript | MSSQL | Node | Express | React JS | Vue JS | Next JS | Redux | NoSQL | Git | GraphQL | Jest | Flask | MongoDB | Linux/Unix | Docker | CSS | HTML | Microservices | Postgres | Backend | Full-Stack | Cypress | Playwright | Django | Redis | Selenium | RabbitMQ

Experience

Principal Software Engineer Wexa.ai *Hyderabad, India* **10/2024 – current**

Contributed to building AI co-workers by refactoring the application for improved performance and scalability, optimizing it for handling heavy loads.

SDE-1 CloudSEK *Bangalore, India* **03/2024 – 08/2024**

- Created an automated script to scrape data from various websites using specific keywords, successfully identifying and flagging fake customer care numbers.
- Created an automated script to download stealer logs and files from various cloud file storage services.
- Actively monitored and scraped forums on the dark web to detect and report sensitive information breaches, contributing to enhanced data security measures.

Founding Engineer Truto *Bangalore, India* **09/2023 – 02/2024**

- Integrated AI Chat bots on various platforms like Meta Messenger, Meta Workspace, Microsoft Teams, Google Chat, etc.
- Added many features and revamped the company website.

Software Engineer Pensieve *Jakarta, Indonesia* **09/2022 - 09/2023**

- Designed and implemented scalable APIs for setting up a license monitoring project from scratch which was an internal project.
- Worked with face-recognition AWS APIs to create an application for detecting faces in videos using Django.
- Developed Web Scraping bots to scrape social media websites like Facebook, Instagram and Twitter using Playwright automation framework.
- Added feature to the product which helped the clients to categorize different telecom users with graphical representation of the data.
- Continuous Integration/Deployment Pipeline Integration, pull requests, code reviews, unit/integration/e2e testing

Education

Bachelor of Technology JNTU, Hyderabad *Hyderabad, India* **08/2016 - 08/2021**

- Major in Electronics and Communication Engineering

Projects

- Movie Search App (06/2022):** Designed an Interactive movies search app using external API which can be bookmarked and create playlists which can be shared using sharable link generated.

Technologies used: React | Node.js | Express.js | MongoDB

Link – [Movies App](#)

Others

- HackOn Top Contestant Issued by Amazon Coding Competition (2022):** In top 100 participants Pan India of HackOn with Amazon Coding Competition.
